

## Technical Datasheet

### General Purpose Painting Discs RoHS Compliant GPPD Series

General Purpose Painting Discs are ideal for masking during painting operations and electronic components. These discs are also recognized as High Temperature Masking Discs. They are on a slit back paper liner for easy removal. General Purpose Painting Discs are made from 7 mil crepe paper that can be removed cleanly without leaving any residue. They can withstand temperatures of up to 200°F.

**APPLICATIONS:** Anodizing, Painting, Powder Coating, Wet Spray, Wave Soldering.

#### TYPICAL PHYSICAL PROPERTIES <sup>(1)</sup>

Color	Beige
Adhesion Type	Rubber Resin
Total Thickness	7.3 Mil
Material	Crepe Paper
Adhesion to Steel	33 oz./in.
Tension Strength	20 lbs./in.
Elongation	10 %
Operating Temperature	200°F
